SERVER NAME

INACTIVE CHANNEL

No Inactive Channel

INACTIVE TIME-OUT

5 minutes

Automatically move members to this channel and mute them when they have been idle for longer than the inactive time-out. This does not affect browsers.

5. Go to the "Integrations" tab. Click "Webhooks" and then "New Webhook".

Integrations

Customise your server with integrations. Manage webhooks, followed channels and apps, as well as Twitch and YouTube settings for creators. [Learn more about managing integrations.](#)

Power-I

New Action

Try the Blockly Beta?

We've made it easy to work with your AIO Actions using Blockly!

The Blockly editor is in beta, so remember:

to verify the Action works as expected

to give feedback and report bugs

you can still use the old form!

No, use the form

Yes, use Blockly!

Choose an action type

Reactive

Scheduled

certain level.

Set up your action

Create an Action in Blockly

If

NightFlushMSG

Fill and save

Is

any new data

Then

send a webhook message to:

To URL

https://... Paste URL from Discord here

NightFlushMSG

value and time.

With Template

Discord Template

[

"username": "([feed_name])",

"content": "([value])"

]

Encode as Form

Valid values are: id value feed_id feed_name feed_key location created_at updated_at expiration lat lon ele

Enclose fields in double brackets, such as ([value])

Note: Must be valid JSON. You can test your template in an online json validator.

Limit Every

Fifteen Min...

Notify on Action Reset

Notify on Action Reset will notify you when a condition is no longer causing an action to alert. It will bypass your notify limit to notify you as soon as the condition is no longer true.

The new action should be visible in your Action section

Actions

Description	Type	Status
If NightFlushMSG is any value then fire a webhook with the NightFlu...	Reactive	Active

Finally test it: Click on "add data" and send a test msg. If all is good you should be getting the msg in discord
